About Me

Software QA Engineer with experience testing diverse digital products across B2B commerce, logistics, real estate investment crowdfunding, HRM/HR tech, recruitment, and edtech domains. Skilled in web, mobile, and basic API testing, with hands-on experience in feature validation, release testing, defect tracking, and QA ownership in fast-paced product environments.

Work Experience

Shomvob Technologies Ltd.

Dhaka, Bangladesh

Software Quality Assurance Engineer

October 2025 - Present

- Managed end-to-end QA across 5-6 products/modules, including Shomvob Jobs, Shomvob Academy, and Shomvob HRM, as the sole QA engineer before helping guide an expanded QA team
- Owned QA during product redesigns and supported the launch of Shomvob HRM through validation, release checks, bug tracking, and demo preparation
- Performed feature, smoke, sanity, release, web, and mobile testing to maintain product quality across multiple platforms
- Investigated client-reported issues, reproduced defects, validated fixes, and supported smoother onboarding for growing clients
- Reported and tracked defects with clear reproduction steps, evidence, severity/priority, and post-fix retesting using Bordio, Excel, and Google Sheets/Docs
- Built automation for settings and basic flows using Postman, while supporting an expanding QA team through mentoring and day-to-day guidance

Shamolima Limited (SNZ Technologies)

Dhaka, Bangladesh

Software Quality Assurance Engineer

August 2024 - September 2025

- Developed and maintained detailed test cases by reviewing product requirements and UI/UX designs
- Collaborated closely with Product Managers and Developers to ensure accurate implementation of product requirements
- Automated core feature APIs, improving test coverage and reducing manual testing time using Postman
- Led daily scrum meetings, coordinating tasks, prioritizing critical issues, and ensuring timely project delivery
- Solely responsible for end-to-end software quality assurance, including manual testing, automation, and process improvements
- Managed critical bugs and ensured high-quality releases despite tight deadlines and limited resources

SmartCrowd

Dubai, UAE (Remote)

Junior Software Quality Assurance Engineer

February 2022 - July 2024

- Reviewed product requirements and UI designs to document test cases for new and existing features.
- Liaised between clients and tech teams, analyzing root causes of issues and delivering actionable findings.
- Created tutorials and documentation to improve communication between Client Relations and non-technical teams.
- Mentored two QA team members on domain knowledge and testing best practices.
- Led testing for iOS platform and key features like Apple Pay, Share Transfer Facility, and New Registration Flow.
- Performed database analysis and data validation testing to ensure issue regeneration and data integrity.

ShopUp

Dhaka, Bangladesh

Intern- Team Tech, Product Management

August 2021 - January 2022

- Implemented Python scripting to automate few tasks to increase efficiency and accuracy
- Implemented tracker to identify problematic zones
- Co-designed an MWS Audit Dashboard to track the progress updates on time
- Providing access and onboarding of new MWS, MWS agents, Retail Agents, Soho Agents
- Identify technical issues of the MWS process and communicate with developers to solve the issues

Educational Qualification

BRAC University

Dhaka, Bangladesh

Master of Science in Computer Science

2024 - Present

- CGPA: 3.43 out of 4.00

- CGPA: 3.36 out of 4.00
- Thesis: A Deep Learning Approach to Depression Detection Based on Convolution Neural Networks and Transfer Learning

Technical Skills

Manual Testing	Feature Testing, Smoke Testing, Sanity Testing, Regression Testing, Gorilla Testing, Load Testing, API Testing
API Testing	Postman, Newman
Performance Testing	JMeter
Web Automation	Selenium, Playwright, Cypress
App Automation Testing	Appium
Testing Frameworks	JUnit, TestNG, REST Assured
BDD Frameworks	Cucumber
Programming Language	Java, Python, JavaScript
Software Architecture	DFD, SDLC, Waterfall Software Development, Object Oriented Programming, Use Case Diagram
Product Management	Agile Product Development Tools: JIRA, Trello, Confluence, Miro, Airtable
Web Development	HTML, CSS, PHP, Wordpress
Databases	MySQL, SQLite
Machine Learning	Skilled in Image Classification
Miscellaneous	Ethical Hacking, Git, LaTeX, Animation Making

Project Works

API Testing using Postman

Tools / Technology Used: Postman, Newman

- In this GitHub repository, I have tried to show different types of passed test cases and also cases where test case might fail. The reasons are also included with Scenarios, Documentation, Test Cases, Bugs & Improvement, and Newman Report.
- Tools / Technology Used: Postman, Newman

API Testing on Dmoney API with Rest Assured

Tools / Technology Used: Rest Assured, Commons-Configuration, Jackson Databind, TestNG, Gradle, Allure

- In this GitHub repository, I automated API testing using Rest Assured

Web Automation using JUnit and Selenium

Tools / Technology Used: Tool: Selenium; Build tool: Gradle; Language: Java; Test Runner: Junit

- In this GitHub repository, I tried to automate a form using JUnit and Selenium. Also included detailed positive and negative test cases with detailed bug report.

Web Automation on Orange HRM Website with Selenium and TestNG

Tools / Technology Used: Selenium Webdriver, TestNG Framework, Allure

- In this GitHub repository, I tried to automate the Orange HRM Website. It also generates detailed reports using Allure to provide insights into the test results.

App Automation using Appium (Google Calculator & EMI Calculator)

Tools / Technology Used: JDK, Android Studio, SDK, Appium

- In this GitHub repositories, I tried to automate Google Calculator and EMI Calculator and performed basic operations
- Click to view Live Demo: Google Calculator and EMI Calculator

Search Automation with Cucumber Selenium

Tools / Technology Used: Selenium, Cucumber, Junit, maven

- In this GitHub repository, I tried to search automation with Cucumber Selenium. In this project, I visited the Github site and searched for something using cucumber.

Certifications

- Full stack SQA and Test Automation, Road to SDET, 2023
- Data Analyst With SQL & Python, Farhan's Academy, 2024
